CONCORDIA UNIVERSITY

School of Graduate Studies

This is to certify	that the thesis prepared		
By:	Mr. Your name here		
Entitled:	A LATEX Thesis Template for ENCS Graduate Student from Concordia		
	University		
and submitted in	partial fulfillment of the requirements for the degree	of	
	Doctor of Philosophy (Industrial Engineer	ring)	
complies with th	ne regulations of this University and meets the accep	oted standards with respect to	
originality and q	uality.		
Signed by the Fi	nal Examining Committee:		
	Dr. Name of the Chair	Chair	
	Dr. Name of External Examiner	External Examiner	
		Examiner	
	Dr. Name of Examiner One	Examiner	
		Examiner	
	Dr. Name of Examiner Two		
	Dr. Name of Supervisor	Supervisor	
	Dr. Hame of Supervisor		
Approved by

Abstract

A LATEX Thesis Template for ENCS Graduate Student from Concordia University

Your name here, Ph.D.

Concordia University, 2021

This thesis template has been created to make it easy to prepare your thesis using LaTeX while adhering to the Concordia University Thesis Specifications posted online. The official thesis examples are provided here: http://www.concordia.ca/content/dam/concordia/offices/sgs/docs/handbooks/thesispreparationguide.pdf. The template has been tested with TeXstudio, TeXworks, CTex, and TeXnic under MikTex 2.9, with UTF-8 encoding.

Table 1.1	Elements defined for the ROW (Zeng, 2006)	_

Chapter 1

Introduction

Chapter 1 provides a brief summary on some basic LATEX elements to be used in a thesis. A comprehensive literature review on [your topic] is presented in Chapter 2. Bla bla bla

1.1 Figure and Table

Text body of the Section 1.1.

1.1.1 Figure

A figure example is shown in Figure 1.1.

1.1.2 Table

Table 1.1 illustrates a very complex table with figures in its cells.

1.2 Itemized examples using list structures in LATEX

Item list using "itemize" structure are given below:

- Use bold/italic for emphasis, but keep its use to a minimum. Avoid using underlining in your paper.
- Use a consistent spelling style throughout the paper (US or UK).

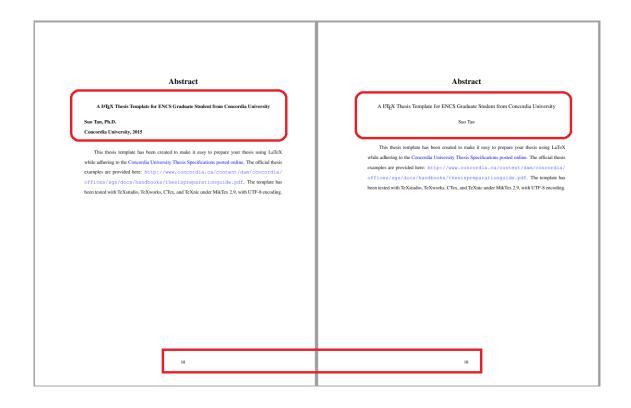

Figure 1.1: An illustration of requirement compliance.

Table 1.1: Elements defined for the ROM (Zeng, 2008).

Туре		Graphic Rep-	Description
		resentation	
Object	Object	0	Everything in the universe is an object
	Compound Object	0	It is an object that includes at least two objects in it
	Constraint Relation	• ξ	It is a descriptive, limiting, or particularizing relation of one object to another
Relation	Connection	[ı]-→	It is to connect two objects that do not constrain each other
	Predicate Relation	ρ	It describes an act of an object on another or that describes the states of an object

- o Use double quotes.
- Use %, not percent.
- Do not use ampersands (&) except as part of the official name of an organization or company.
- Keep hyphenation to a minimum. Do not hyphenate 'coordinate' or 'non' words, such as 'nonlinear'.

The following are using "enumerate" structure:

- (1) For complete or near complete sentences, begin with a capital letter and end with a full stop.
- (2) For short phrases, start with lower case letters and end with semicolons.

1.3 Algorithm

The pseudo code shown in Algorithm 1 describes the proposed algorithm.

```
Algorithm 1 Calculate the probability of G
```

```
Require: p \in [0, 1], G
Ensure: None

1: for i = 0 \rightarrow 2^d - 1 do \Rightarrow d is an integer

2: if n(\nu_i) = 0 then

3: if x < p then \Rightarrow x is a normal distribution number in the range of [0, 1]

4: Occupy v_i site with probability p

5: end if

6: end if

7: end for
```

1.4 Equation

An equation example is shown in Eq. 1.

$$f(ENC) = \int_0^1 (e^x + x^2)$$
 (1)

1.5 Quotations

"It was easier in the beginning when there was only the RED-camera, but now, after RED, it just continuous. And all the different manufacturers, they cannot agree upon what is the standard file format, codec, or compression algorithms, and so on. It is a jungle."

CEO, Full Name (Company A)

1.6 Citations

It is suggested that you choose "\citet" and/or "\citep" to cite references. The "\citet{key}" gives you a format of "Name (1990)", whileas "\citep{key}" delivers a format of "(Name, 1990)".

For example, Wang and Zeng (2009) extended their research from (Zeng, 2008).

Chapter 2

Literature Review

Put your literature review contents here.

Appendix A

My Appendix

Appendix figure example is shown in A.1 below

Figure A.1: An figure example in Appendix A.
